

Military Terrain Analyst

Position Description:

The terrain analyst will be responsible for the development of terrain related geospatial intelligence products and services. They will also be responsible for the development and delivery of military related terrain analysis training support programs; both domestically and internationally.

Responsibilities:

Collaborate with other members of the production team and training group.
Deliver Terrain related GIS products for military operations.

Develop and deliver Terrain Analysis training support programs to domestic and international clients.

Requirements (experience/skills):

Military Terrain Analysis training and certification from the Canadian Armed Forces, British Armed Forces or Australian Armed Forces.

Must have training and experience using ArcGIS, Erdas Imagine and Remoterview Pro.

At least five years of military experience as a Terrain Analyst.

Has deployed and supported overseas military operations in Iraq, Afghanistan, Former Yugoslavia or other operational theatres.

Comments/Special Considerations:

The successful candidate will be expected to work under stressful conditions and on occasion odd hours.

Location: Carleton Place, Ontario and other international locations.
