Press Release For Immediate Release

Completion of Geospatial Intelligence (GEOINT) Analysis Course - GIAC 0601

Carleton Place, Ontario 29 January, 2007 – ImStrat Corporation is pleased to announce the completion of a Geospatial Intelligence (GEOINT) Analysis Course (GIAC) on 26 January 2007. The ImStrat Corporation GIAC Course commenced on 8 August 2006 and consisted of 15 training serials encompassing all aspects of Geospatial Intelligence Analysis from; Remote Sensing Applications, Terrain Analysis, General Intelligence (GENINT), Imagery Intelligence (IMINT) and other specific training disciplines. The course concluded with a 10 day extensive “Operational Level” Exercise incorporating components of each training serial. The GIAC students were presented graduation accreditation certificates by ImStrat Executives and Diplomatic representatives of their host nation at the Carleton Place Heritage Inn, in a gracious ceremony.

To talk to our training support staff or to request training, call our toll free line at 1-877-269-5940, or email your training requirements to trg@imstrat.on.ca

About ImStrat Corporation

ImStrat Corporation is a privately owned Geospatial Intelligence Analysis innovation solutions and training provider. These services are provided by some of the most highly trained Geospatial Intelligence Analysts on the market today.

ImStrat's innovative solutions and training support programs expand the range of Geospatial Intelligence requirements. This includes but not limited to confidential analysis support for maritime surveillance operations, baseline intelligence product development for use in other geospatial database systems, to complete turn-key imagery intelligence analysis training support programs.

ImStrat's training programs are recognized the world over as the most comprehensive and professional services on the market today. As such, ImStrat continues to ensure our programs are the most up to date using the latest in satellite optical and radar imagery data, and Geospatial Intelligence Analysis software and techniques. The objective of all of ImStrat's courses is to ensure all students leave with not just knowledge, but an ability to put that knowledge and skills into practice upon their return home.

ImStrat also offers a complete range of commercial satellite imagery products ranging from Quickbird high resolution optical imagery to the soon to be released TerraSAR-X 1 metre resolution X-band radar imagery. Both are well suited for multi-sensor and temporal analysis operations.

About Geospatial Intelligence Training Programs

ImStrat Corporation provides a complete range of Geospatial Intelligence Analysis training course programs. These programs are considered the most in-depth and professional imagery based training courses on the world market today. All of the courses listed are "on the shelf" and available immediately. Nonetheless, all of ImStrat's courses are updated on a continuous basis with the latest analytical methodologies and highest resolution imagery datasets. In addition, new courses are developed on a regular basis. Students attending any of ImStrat's courses will be ensured that they will not just walk away with knowledge, but also with an effective skill set which can quickly be employed back at their respective organizations.

Training is conducted either at ImStrat's Geospatial Intelligence Training Centre just outside of Ottawa, Canada in Carleton Place, Ontario Canada, or instructors can be sent to the clients on-site location. Please be advised that some courses require extensive software and hardware support, plus multiple instructors for long duration courses. Therefore, some courses can only be offered at ImStrat's GEOINT Training Centre. Please contact ImStrat's training group for further information.
