Press Release

For Immediate Release

Satellite Imagery Sales Promotion

Carleton Place, Ontario 4 November 2009 - ImStrat Corporation is pleased to offer our clients a special pricing promotion on satellite imagery orders. This includes both archive imagery and new taskings. A 25% discount is being offered on Tasking orders. In addition, archive imagery is being offered at a 30% discount price.

The Tasking promotion is in effect immediately and will be offered until 31 December 2009. The archive promotion is in effect immediately, until 20 December 2009.

To receive further information and to place your orders please contact our imagery support staff on our toll free line at 1-877-269-5740, or email your imagery requirements to imstrat@imstrat.on.ca.

About ImStrat Corporation

ImStrat Corporation is a privately owned Geospatial Intelligence Analysis innovation solutions and training provider. These services are provided by some of the most highly trained Geospatial Intelligence Analysts on the market today.

ImStrat's innovative solutions and training support programs expand the range of Geospatial Intelligence requirements. This includes but not limited to confidential analysis support for maritime surveillance operations, baseline intelligence product development for use in other geospatial database systems, to complete turn-key imagery intelligence analysis training support programs.

ImStrat's training programs are recognized the world over as the most comprehensive and professional services on the market today. As such, ImStrat continues to ensure our programs are the most up to date using the latest in satellite optical and radar imagery data, and Geospatial Intelligence Analysis software and techniques. The objective of all of ImStrat's courses is to ensure all students leave with not just knowledge, but an ability to put that knowledge and skills into practice upon their return home.

About DigitalGlobe

DigitalGlobe is a leading global provider of commercial high-resolution earth imagery products and services. Sourced from their own advanced satellite constellation, their imagery solutions support a wide variety of uses within defense and intelligence, civil
