

**ImStrat Corporation is the only Canadian supplier of
Overwatch Geospatial Imagery Intelligence Products.**

Overwatch is a leading provider of multi-source intelligence analysis tools. They offer a full suite of geospatial tools from rapid GEOINT support to fused Intelligence and joint targeting operations. Their suite of cutting edge software tools enables analysts to simultaneously access multiple sources of information to generate new, relevant, and actionable intelligence faster and more effectively for war fighters, first responders, and policy makers.

Full Suite of Geospatial Tools

The **RemoteView** product line is the primary geospatial intelligence software application used by the Canadian, U.S. and UK geospatial intelligence community, plus many other agencies around the world. RemoteView Professional is Overwatch’s flagship product, with over 12,000 licenses deployed in 26 countries.

A Valuable Tool for the Ingesting and Analysis of all forms of Geospatial Data, including:

- Commercial Satellite Imagery (CSI); Panchromatic Optical, Infrared and Radar
- Tactical Air Reconnaissance; FLIR, SLAR
- Full Motion Video
- National Technical Means (NTM)
- Raster Maps
- Vectors
- Digital Terrain Elevation Data (DTED)
- Stereo Imagery

Provides federated access to disparate catalogs and multiple database types, such as:

- Oracle
- SQL Server
- Web Services
- IEC Buffer
- MIDB

For more information on the software available from Overwatch™ Textron Systems please feel free to contact one of our software sales consultants on our toll free number 1-877-269-5940 or at imstrat@imstrat.on.ca.
