## Press Release

For Immediate Release

**Carleton Place, Ontario 11 August, 2005** – We are very pleased to announce ImStrat Corporation has become an authorized direct reseller of **DigitalGlobe** of Colorado, USA. ImStrat can now offer the complete range of DigitalGlobe products. The lead product being the world's highest resolution satellite imaging system, Quickbird.

Tom Last, President of ImStrat said, "In light of the fact there are only a few select Canadian companies as DigitalGlobe resellers, our distributorship is a great honour for ImStrat. It reflects the trust and respect both companies have for each other's dedication and professionalism".

ImStrat is fully committed to DigitalGlobe's success. As such our partnership also includes imagery analysis training support to DigitalGlobe's exclusive and mutual international clients.

For more information on ImStrat's services, training support programs and multi data sales support, visit [www.imstrat.on.ca](http://www.imstrat.on.ca) or call our toll free line at 1-877-269-5940.

### **About ImStrat Corporation**

ImStrat Corporation provides highly professional consultation in remote sensing mission planning, data implementation, management, imagery intelligence analysis, and data extraction for clients around the world. Our team is highly trained in the art and science of visual imagery analysis in order to produce end user products, using the complete spectrum of satellite and airborne sensor platforms. With today and tomorrows, high spatial resolution remote sensing systems, ImStrat Corporation can provide detailed data extraction for use in an information database; executive decision making process; or a Geographic Information Systems (GIS) application. ImStrat Corporation also provides in-depth imagery intelligence training programs for national and international clients.

### **About DigitalGlobe**

Longmont, Colo.-based DigitalGlobe ([www.digitalglobe.com](http://www.digitalglobe.com)) is the clear leader in the global commercial Earth imagery and geospatial information market. The company's technical superiority and innovation, unparalleled commitment to customer service, extensive business partner network and open systems philosophy make DigitalGlobe the preferred supplier of imagery products. DigitalGlobe's QuickBird satellite is the world's highest resolution commercial imaging satellite, and the company will launch its next-generation WorldView satellite no later than 2006. The company's updated and growing ImageLibrary contains over one hundred million square kilometers of global imagery for countless mapping and planning.
